

ClareOne Siren

ZW080

Clare Controls

Used in this guide.

Important safety information.

Please read this and the online guide(s) at <https://www.clarecontrols.com/helpcenter>. Failure to follow the recommendations set forth by Clare Controls may be dangerous or cause a violation of the law. The manufacturer, importer, distributor, and/or re seller will not be held responsible for any loss or damage resulting from not following any instructions in this guide or in other materials.

Warning: To prevent possible hearing damage, test only when wearing appropriate hearing protection.

ClareOne Siren is intended for indoor use in dry locations only. Do not use in damp, moist, and/or wet locations.

Quick start.

The following will step you through installing the ClareOne Siren and connecting it to your ClareOne Z-Wave™ network.

1. Plug ClareOne Siren into a power outlet; its Network LED will slow flash.
2. To connect ClareOne Siren to your automation network;
 - a. If your Z-Wave gateway supports SmartStart, scan ClareOne Siren's QR Code using your gateway's app. Once scanned, ClareOne Siren will join your Z-Wave network automatically within 10 minutes.
 - b. Else, set your gateway into its 'add device' mode. Refer to its manual if you are unsure of how to perform this step.
 - c. Then press ClareOne Siren's Action Button once; its Network LED will flash quickly to indicate pair mode.
 - d. If your gateway supports S2 security, and you want your device to use this higher level of security, please enter the first 5 digits of the DSK into the gateway's

interface when prompted. Refer to the gateway's manual if you are unsure how to perform this step. Do not lose the DSK or remove it from the product or package.

3. When ClareOne Siren successfully joins your Z-Wave network, its Network LED will become a solid ON state for a few seconds and then OFF. Should its Network LED still slow flash 3 times and then OFF, this indicates it was unable to join your Z-Wave network; repeat the above steps and please contact us for further support if needed.

ClareOne Siren is now a part of the ClareOne Z-Wave network.

You are able to test the ClareOne Siren's speaker system manually. **Safety:** Test only when wearing necessary ear protection. ClareOne Siren's speaker emits tones up to 105dB that can cause hearing damage. To test manually, press and hold Action Button for 5 seconds.
