

Gateway Controller

User's Guide

Model: ITB-5104

Introduction

This document describes the Gateway Controller (Model ITB-5104) overview and how to use Z-Wave™ functionality.

Feature Overview

The current product is a home gateway device. IoT devices such as sensors are connected and can be controlled with this device. This device supports various interfaces for the functionalities of Wireless LAN, Bluetooth®, Z-Wave™.

The device can collect sensing data from various Z-Wave™ sensor devices, and uploading of the data to a cloud server by wired LAN communication is available.

The Gateway Controller has the following general features:

- LAN Ports
- Wireless LAN client
- Z-Wave™ communication
- Bluetooth® communication

※ The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc

Names of Product Device Parts

The top and bottom view of the product device and parts names are as follows.

No	Part Name
1	System Status Lamp
2	Volume Up Button
3	Volume Down Button
4	Mute Button
5	Application Button
6	Inclusion/Exclusion Button(Mode Button)
7	Micro USB Port
8	USB Port
9	LAN Port
10	DC-IN Jack

LED Indication Information

System status LED/Lamp Indicator:

LED Indicator	Device Status
White Turn on.	Device is booting up.
Blue Turn on.	Device is connected to the cloud and is operating normally.
Green Turn on.	Device is trying to connect to the cloud.
Green Blinking.	Z-Wave Inclusion/Exclusion mode.
Yellow Turn on.	Voice recognition is in progress.
Red Turn on.	Voice recognition, but Mute state.
Red Blinking.	Firmware update is in progress.

Installation

Installation of the Gateway Controller is only a one step process:

1- Connect an AC adapter to the gateway and plug it into an AC outlet. The gateway has no power switch. It will begin operating as soon as it is plugged into the AC adapter/outlet.

The gateway needs to be connected to the internet via a LAN port.

Interoperability

This product can be operated in any Z-Wave™ network with other Z-Wave™ certified devices from other manufacturers. All mains operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network.

Security Enabled Z-Wave Plus™ Product

The gateway is a security enabled Z-Wave Plus™ product.

Basic Command Class Handling

The gateway will ignore Basic Commands received from other devices in the Z-Wave™ network.

Support for Association Command Class

Group id: 1 – Lifeline

Maximum number of devices that can be added to the group: 5

All devices are associated with the group.

Android Controller Application “Gateway Controller”

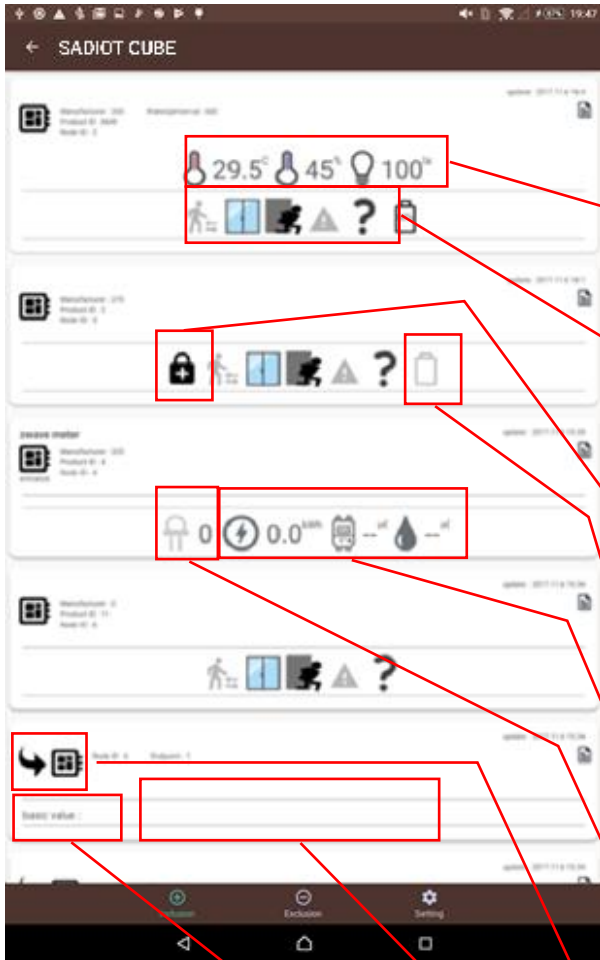

Gateway Select Screen

When an available device is detected that can be used, the icon of the gateway is displayed.

If nothing is displayed, please confirm that the network is correctly set.

Device Viewer

When a gateway is selected, available devices will be displayed. If there are no available devices, nothing will be displayed.

In the case of a device that supports temperature, humidity or illuminance, a report value is displayed.

These icons represent the state of Home Security. Whichever icon that appears shows the current event according to a notification received from the device.

If a device supports the lock / unlock function, the Lock Status is displayed.

The remaining battery power is displayed.

The values of various meters are displayed.

In order from the left: power meter, gas meter, and water meter.

The value of the indicator is displayed.

If a device has end points, all end points are displayed.

When an unsupported device is detected, no icon will be displayed in this area.

The report value of the latest Basic Command is displayed. *Only for unsupported devices.

WakeupInterval: The value of the Wakeup Interval is displayed.

Manufacture: The Manufacture ID is displayed.

Product ID: The Product ID is displayed.

Node ID: The Node ID is displayed.

By tapping the Report icon, a dialog of Association, Association Group Info, and Configuration is displayed.

Inclusion (Add)

Inclusion (Adding devices)

To add a device to the Z-Wave™ network, press the “Inclusion” button in the Android Controller Application. This will put the gateway into Inclusion Mode. Then a gateway operation dialog will appear in the Android Controller Application. The gateway operation dialog will be displayed during the Inclusion Mode.

To stop the Inclusion Mode, press the “Abort” button in the gateway operation dialog, or wait for one minute and the Inclusion Mode will automatically stop. When the Inclusion Mode has stopped, the gateway operation dialog will automatically disappear.

For S2 devices, a dialog is displayed.

Select the item you want to set.

- S0
- S2_ACCESS
- S2_AUTHENTICATED
- S2_UNAUTHENTICATED

If you selected S2_ACCESS or S2_AUTHENTICATED, enter the device PIN.

The device PIN can be found on the device itself, in the gift box, etc. example.

59770-04766-10044-56736-54942-14273-38328-09266

Exclusion (Remove)

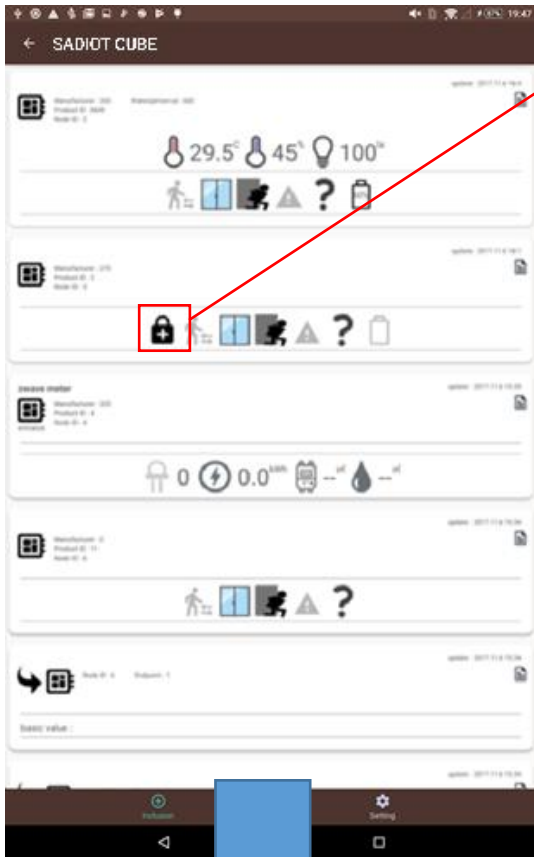

Exclusion (Removing devices)

To remove a device from the Z-Wave™ network, press the “Exclusion” button in the Android Controller Application. This will put the gateway into Exclusion Mode. A gateway operation dialog will appear in the Android Controller Application. The gateway operation dialog will be displayed during the Exclusion Mode.

To abort the Exclusion, press the “Abort” button in the gateway operation dialog, or wait for one minute and the Exclusion Mode will automatically stop. When the Exclusion Mode has stopped, the gateway operation dialog will automatically disappear.

Lock/Unlock Operation

When you tap the lock status icon, Lock / Unlock Operation dialog is displayed.

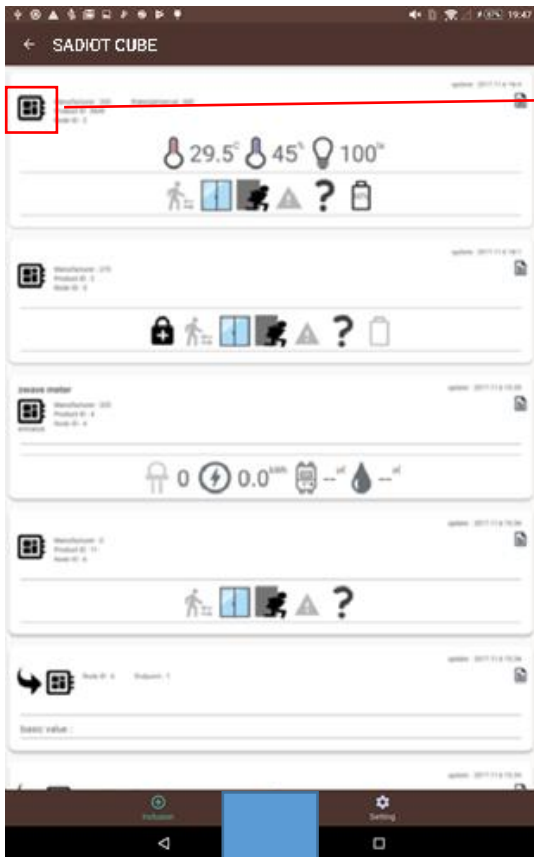

Send an instruction to lock to the Gateway.

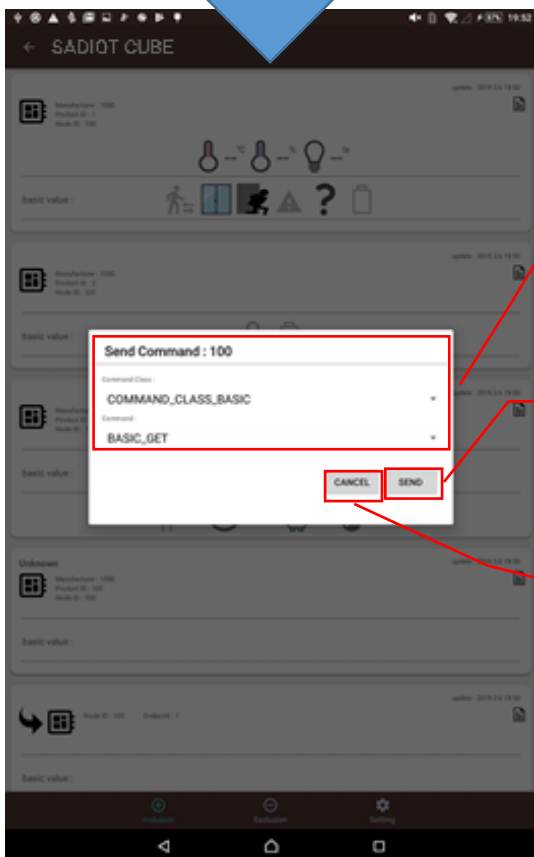

Send an instruction to unlock to the Gateway.

Update the lock status.

Send Command

When the Device button is tapped, the "Send Command" dialog is displayed.

For the tapped device, select the command class and enter the necessary information to be transmitted.

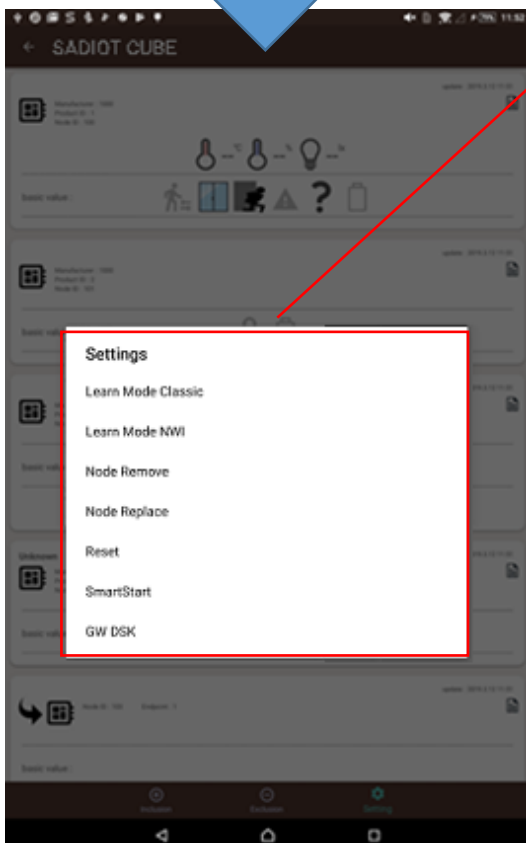

Send the command currently entered.

Cancel (The dialog disappears).

Settings

When tapping the Setting button, a Settings dialog will be displayed.

Select an item to be set.

When tapping an item, a dialog will be displayed.

- Learn Mode Classic
Set the gateway to Learn Mode(Classic)
- Learn Mode NWI
Set the gateway to Learn Mode(NWI)
- Node Remove
Remove the device with the selected Node ID
- Node Replace
Replace the device with the selected Node ID
- Reset
Factory default reset
- SmartStart
Show Provisioning List
- GW DSK
Show Gateway DSK(QR-CODE)

Learn Mode

To add an IoT gateway into another Z-Wave™ network as a secondary controller or inclusion controller, press “Learn Mode Classic” or “Learn Mode NWI” in the Settings dialog. A gateway Operation dialog will appear and will be displayed during the Learn Mode.

To abort the Learn Mode, press “ABORT”. When the Learn Mode has been stopped, the gateway operation dialog will automatically disappear.

Node Remove

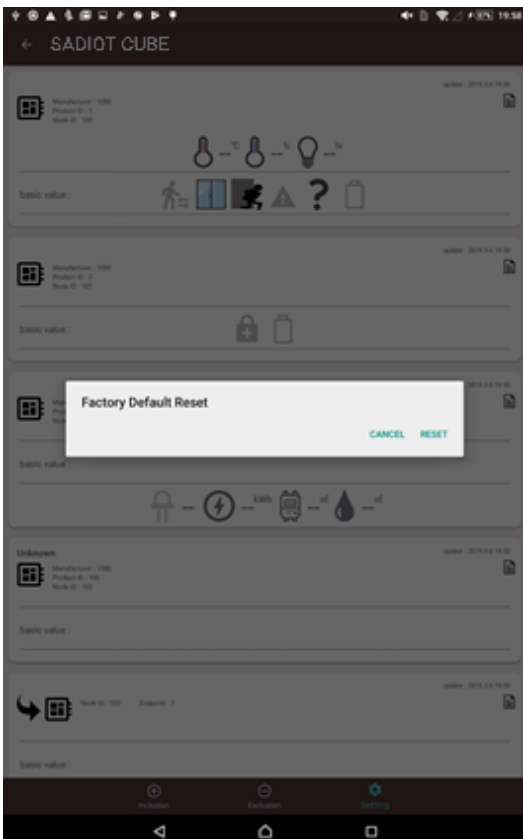

To remove a failing node from the Z-Wave™ network, press “Node Remove” in the Settings dialog, and tap the Node ID to be removed in the Node Remove dialog.

Node Replace

To replace a failing Node with another equivalent device, press “Replace” in the Settings dialog, and tap the Node ID to be replaced in the Node Replace dialog. The Gateway Operation dialog will appear.

Reset (Factory Default Reset)

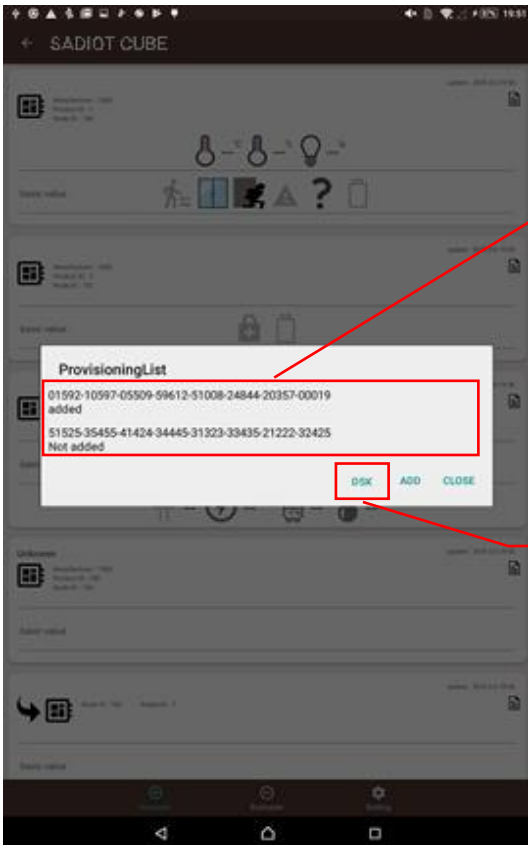

Press “RESET” in the Factory Default Reset dialog. This will reset the Z-Wave™ chip, and the gateway will show “DEVICE RESET LOCALLY NOTIFICATION” after the restart.

If this controller is the primary controller for your network, resetting it will result in the nodes in your network becoming orphaned, and it will be necessary after the reset to exclude and re-include all of the nodes in the network. If this controller is being used as a secondary controller in the network, use this procedure to reset this controller only in the event that the network primary controller is missing or otherwise inoperable.

SmartStart

This product supports SmartStart integration and can be included in the network by scanning the QR code or entering the PIN.

Display the registered provisioning list (DSK and inclusion status). Press an item in the list to delete it.

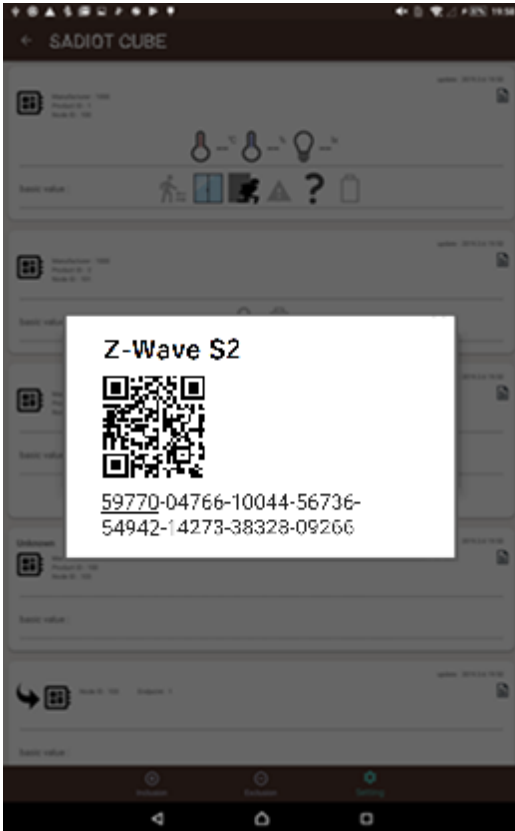

Press "Add" to display the camera screen.

As the camera starts, hold it over the QR code. Register the DSK when you correctly hold the camera over a QR code on the product label.

The complete DSK of Gateway is printed on the gift box.

Z-Wave S2(QR-Code)

Displays the DSK and QR code of the gateway Z-Wave S2.

Replication (Copy)

In the event that the gateway is already the controller of the Z-Wave™ network, put the gateway into Inclusion Mode, and put another controller into the Learn Mode. The Replication will begin and network information will be sent to another controller. In the event that the gateway is integrated into an existing Z-Wave™ network, put the gateway into Learn Mode, and put the existing controller into Inclusion Mode. The Replication will begin and network information will be received from the existing controller.
