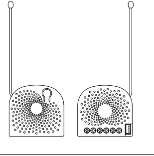
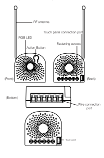
In-Wall Dimmer



① Oomi by Fantem In-Wall Dimmer.

Oomi In-Wall Dimmer is a Z-Wave smart dimmer device specifically used to enable Z-Wave command and control (on/off/dim) of any in-wall switches. It can report immediate wattage consumption or kWh energy usage over a period of time. In the event of power failure, non-volatile memory retains all programmed information relating to the unit's operating status.
It can connect to 2 external manual switches to control the load ON/OFF independently. Its surface has a pin socket, which can be used for connecting to the touch panel, so you can also use the touch panel to control the In-Wall Dimmer.
The In-Wall Dimmer is also a security Z-Wave plus device and supports Over The Air (OTA) feature for the products firmware upgrade.

② Familiarize yourself with your In-Wall Dimmer.



Notes for the wire connection ports:
L – Power input for live
N – Power input for neutral
OUT – Output for load
COM – Common port for all External switches (S1 and S2)
S1 – External switch 1 control for load
S2 – External switch 2 control for load

Install the In-Wall Dimmer.

Important: A licensed electrician with knowledge and understanding electrician systems and electrical safety should complete the electrical installation.

1. Shut off the main circuit breaker of your home for safety during the installation and ensure the wires are not short circuited during the installation which will cause damage to the In-Wall Dimmer.

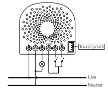
Note: Your home's main circuit breaker must support the overload protection for safety.

2. Preparing connection wires
   14 AWG or 12 AWG power wires for Input/ Output.
   18 AWG copper wires for external manual switch.
   Use the wire stripper cut the metallic part of the connection wire and make sure the length of the metallic part is about 5mm.

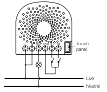
Cut wire if neccessary   Strip Gage (measure barehere)

Note: All connection wires need to be flexible cable.

Wiring diagram of 3-Wire system

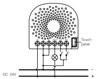


Wiring diagram of 2-Wire system

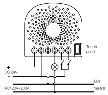


Note: The "N" terminal should be connected to the "L" terminal when the In-Wall Dimmer is installed by 2-Wire system.

Wiring diagram of DC24V power input
Since the In-Wall Switch also supports the DC24V power input, so you can use it to control the loads that powered by DC24V.

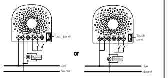


If the output loads should be only powered by AC120V or AC230V, you can change the wire connection as below:



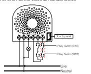
Note: The "IN" terminal should be connected to the "Live" of AC 120V/230V power wire.

You may need to connect a small power load (E.g. a LED light or a compact fluorescent lamp) to be controlled. In this case, the In-Wall Dimmer may not get enough power from the AC power supply, so a bypass can be added to act as a dummy load to keep your In-Wall Dimmer get enough power from the power supply. It can also keep your light from flickering when diming off the light.



All above wiring diagrams show that the In-Wall Dimmer uses 2-Way or momentary button switches as the external manual switch.
The below diagram will show you that the In-Wall Dimmer uses the SPDT (Single-Pole Double-Throw) switches as the external manual switch.

Wiring diagram of SPDT as the external manual switch



Since the S1 port and S2 port can be used to control the load separately, you can choose to connect the SPDT switches to the S1 or S2.

3. Install In-Wall Dimmer to the gang box.
   a. Live/Hot wire connection: Connect the Live/Hot wire to the "L" terminal on the In-Wall Dimmer.
   b. Neutral wire connection: Connect the Neutral wire to the "N" terminal on the In-Wall Dimmer.
   c. Load wire connection: Connect the Load wire to the "OUT" on the In-Wall Dimmer.
   d. External/manual Switch connection: Connect 2 18AWG wires to the "S1" and "S2" on the In-Wall Dimmer.
   e. External/manual Switch connection: Connect 2 18AWG wires form the 2 terminals on the External/manual Switch to the "COM" on the In-Wall Dimmer.

Note: The above physical connection diagram is for 3-Wire system, the below diagram would be for the 2-Wire system.

In 2-Wire system, since the power input terminals of In-Wall Dimmer just need to connect one power wire, so the terminal of "N" on In-Wall Dimmer should connect to the "L" on the In-Wall Dimmer.

4. Mounting the gang box.
   a. Position all wires to provide room for the device. Place the In-Wall Dimmer inside the gang box towards the back of the box.
   b. Position the antenna towards the back of the box, away from all other wiring.
   c. Reinstall the In-Wall Dimmer to the gang box.
   d. Reinstall the cover onto the gang box.

(3-Wire system)

(2-Wire system)

Note:
1). The gang box should be sized 3×2×2.75 inch/ 75×50×70 mm or larger, minimum volume 14 in3 / 230cm3.
2). Use flexible copper conductors only.
3). If a Bypass installation is needed, the Bypass should be in parallel with the bulb load, see below:

Warning: The main circuit breaker or fuse must be shut off during the Bypass installation or bulb change.

5. Restore Power.
   Restore power at the circuit breaker or fuse.

When the In-Wall Dimmer is powered on, it will automatically identify the connected load type and then match it.

③ Quick start.

Adding your In-Wall Dimmer to a Z-Wave network.

After your In-Wall Dimmer is installed and powered on, you are now able to manually control the In-Wall Dimmer to turn it On/Off/Dim directly via pressing your In-Wall Dimmer's Action Button, it is time to add your In-Wall Dimmer to the Z-Wave network. To set your Z-Wave gateway/controller into pairing mode, please refer to the respective section within your controller instruction manual.

1. Set your Z-Wave controller into pairing mode.
2. Press the Action Button on the In-Wall Dimmer or toggle the external manual switch once, the green LED (non-secure indication) will blink to indicate the In-Wall Dimmer is entering into pairing mode.
3. If the In-Wall Dimmer has been successfully added to your Z-Wave network, its RGB LED will be solid. If the pairing was unsuccessful, the red LED will be on for 2 seconds and then remain a colourful gradient, repeat the instructions above from step 1.

With your In-Wall Dimmer now working as a part of your smart home, you'll be able to configure it from your home control software/phone application. Please refer to your software's user guide for further instructions on configuring In-Wall Dimmer to your needs.
The colour of RGB LED will change according to the output load power level:

Version	LED indication	Output (W)
US	Green	[0W, 48W)
	Yellow	[48W, 96W)
	Red	[96W, 144W)
AU	Green	[0W, 92W)
	Yellow	[92W, 184W)
	Red	[184W, 276W)
EU	Green	[0W, 92W)
	Yellow	[92W, 184W)
	Red	[184W, 276W)

④ Removing In-Wall Dimmer from a Z-Wave network.

Your In-Wall Dimmer can be removed from your Z-Wave network at any time. You'll need to use your Z-Wave network's main controller. To set your Z-Wave controller/gateway into removal mode, please refer to the respective section within your controller instruction manual.

1. Set your Z-Wave controller into removal mode.
2. Press the Action Button on the In-Wall Dimmer or toggle the external manual switch 2 times in fast succession.
3. If the In-Wall Dimmer has been successfully removed from your Z-Wave network, its RGB LED will remain colourful gradient. If the removal was unsuccessful, the RGB LED will still be solid (following the state of the output load), repeat the instructions above from step 1.

⑤ Advanced functions.

Changing mode on the External Switch/Button Control.

The In-Wall Dimmer can be controlled via 2-state (flip/flop) external/manual switch, momentary push button or the 3-way switch. To automatically detect and set the mode to the appropriate type of manual switch wired into In-Wall Dimmer, toggle the button on the manual switch once and wait 2 seconds for the In-Wall Dimmer to detect the type of manual switch.

You can also set the external switch mode through Configuration Command Class.

Parameter 120 [1 byte dec] is the parameter that will set one of the 3 different modes for external switch S1. If you set this configuration to:

(0) Unknown mode
(1) 2-state switch mode
(2) 3-way switch mode
(3) Momentary push button mode
(4) Enter automatic identification mode. (The blue LED will fast blink)

The parameter 121 [1 byte dec] is the parameter that will set one of the 3 different modes for external switch S2. If you set this configuration to:

(0) Unknown mode
(1) 2-state switch mode
(2) 3-way switch mode
(3) Momentary push button mode
(4) Enter automatic identification mode. (The green LED will fast blink)

Note: You can also use the Action Button of In-Wall Dimmer to activate the automatic identification mode, as below:

1. Quick press the Action Button 4 times, which will activate the automatic identification mode for external switch S1, you will see the blue LED fast blinks.
2. Quick press the Action Button 6 times, which will activate the automatic identification mode for external switch S2, the green LED will fast blink.

When the In-Wall Dimmer enters automatic identification mode, it has 20 seconds before timeout for detecting the manual switch.

Touch panel control.

As you can see that the In-Wall Dimmer's surface has a pin port, this port is used to connect the Touch panel. When you have already connected it to the In-Wall Dimmer, you will be possible to control the In-Wall Dimmer through the Touch panel directly.

Monitoring Energy Consumption.

The **Fantem** In-Wall Dimmer can report wattage energy usage or kWh energy usage to a Z-Wave control point when requested. If this function is supported by the control points, the energy consumption will be displayed in the user interface of the control points. (The specific Z-Wave commands supporting energy monitoring are the Meter Command Class. Automatic reports are sent to association group 1, which is setup via the Association Command Class.) Please consult the operation manual for these control points for specific instructions on monitoring the In-Wall Dimmer.

Security or Non-security feature of your In-Wall Dimmer in Z-Wave network.

Including In-Wall Dimmer as a non-secure device:
If you want your In-Wall Dimmer as a non-secure device in your Z-Wave network, press the Action Button once on In-Wall Dimmer when you pair it to your gateway. If inclusion is successful, the green LED will be on for 2 seconds, and then return to a solid indication. If inclusion is unsuccessful, the red LED will be on for 2 seconds and then return to a colourful gradient.

Including In-Wall Dimmer as a secure device:
In order to take full advantage of the In-Wall Dimmer, you will want your In-Wall Dimmer as a security device that uses encrypted messages to communicate in your Z-wave network. A security enabled controller/gateway (or Z-Wave Plus controller) is required.

1. Set your Z-Wave Plus controller into pairing mode.
2. Press the Action Button 2 times within 1 second on the In-Wall Dimmer, the blue LED (secure indication) will blink to indicate the In-Wall Dimmer is entering into secure pairing mode.
3. If the In-Wall Dimmer has been successfully added to your Z-Wave network, its RGB LED will be solid. If the pairing was unsuccessful, the red LED will be on for 2 seconds and then remain a colourful gradient, repeat the instructions above from step 1.

NFC function of your In-Wall Dimmer.

Your In-Wall Dimmer has inbuilt a NFC module. In order to take full advantage of the NFC feature, the Oomi's Touch panel is needed. When you take the Touch panel near to the NFC point of In-Wall Dimmer, you will see light purple LED dims on and then off, at the same time, the product information is read out from In-Wall Dimmer via NFC communication and then displayed on the Touch panel's screen.

If your In-Wall Dimmer is powered, it will send out a Node information frame to start the inclusion/exclusion when the Touch panel touches your In-Wall Dimmer. The Touch panel's screen will pop up a notification message to let you know whether the inclusion/exclusion is successful or not. If the In-Wall Dimmer is included into your Touch panel, you will see the switch ON/OFF icons displayed on the Touch panel.

Reset your In-Wall Dimmer.

If at some stage, your primary controller is missing or inoperable, you may wish to reset all of your In-Wall Dimmer's settings to their factory defaults. To do this, press and hold the Action Button for 20 seconds and then release it. Your In-Wall Dimmer will now be reset to its original settings, and the green LED will be solid for 2 seconds and then remain the colourful gradient status as a confirmation.

⑥ Technical specifications.

Model number: FT111
Power input: 120VAC to 240VAC, 50Hz/ 60Hz.
Rated output: Max 1.2A.
Max standby power: <1W.
Power measurement accuracy: ±3W.
Operating temperature: 0℃ to 40℃/32℉ to 104℉.
Relative humidity: 8% to 80%.
NFC operating distance: Maximum 30mm.
Operating distance: Up to 492 feet/150 meters outdoors.
Supported Loads:

Control ability	Supported load types
With dimming function (On/Off/ Dim control)	Incandescent bulbs, halogen bulbs with or without electronic transformer, dimmable LED bulbs, dimmable compact fluorescent lamps.
Without dimming function (On/Off control)	Non-dimmable bulbs (Compact fluorescent lamps with electronic rectifier, fluorescent tube lamps with electronic ballast, LED bulbs).

⑦ Warranty.

If you are in need of any technical support during or subsequent to your products' warranty, please get in touch with our support team via http://**oomi**.com/support. The Company you bought this product from has also guaranteed to assist you with any of your support needs, and you can also contact them for accordingly.

This guarantee made by the company who you purchased the product from includes the transfer of **Fantem** full warranty to that Company. They've guaranteed that they'll be able to assist you, the Customer, with all technical support and repair needs on our behalf.

Fantem warrants to the original purchaser of Products, that is the Company who you have purchased from, that for the Warranty Period (as defined below), the Products will be free from material defects in materials and workmanship. The foregoing warranty is subject to the proper installation, operation and maintenance of the Products in accordance with installation instructions and the operating manual supplied. Warranty claims must be made to the Company who you have purchased from in writing within thirty (30) days of the manifestation of a problem.

Fantem sole obligation under the foregoing warranty is, at **Fantem** option, to repair, replace or correct any such defect that was present at the time of delivery, or to remove the Products and to refund the purchase price to Company.

The Warranty Period begins on the date the Products is delivered and continues for 12 months. Any repairs under this warranty must be conducted by an authorized **Fantem** service representative and under **Fantem** RMA policy. Any repairs conducted by unauthorized persons shall void this warranty.

Excluded from the warranty are problems due to accidents, acts of God, civil or military authority, civil disturbance, war, strikes, fires, other catastrophes, misuse, misapplication, storage damage, negligence, electrical power problems, or modification to the Products or its components.

Fantem does not authorize any person or party to assume or create for it any other obligation or liability in connection with the Products except as set forth herein. **Fantem** will pass on to Company all manufacturers' Material warranties to the extent that they are transferable, but will not independently warrant any Material. Company will assist Customer with all warranty, repair, return and technical support needs, Company must prepay shipping and transportation charges for returned Products, and insure the shipment or accept the risk of loss or damage during such shipment and transportation. **Fantem** will ship the repaired or replacement products to Company freight prepaid.Customer and Company shall indemnify, defend, and hold **Fantem** affiliates, shareholders, directors, officers, employees, contractors, agents and other representatives harmless from all demands, claims, actions, causes of action, proceedings, suits, assessments, losses, damages, liabilities, settlements, judgments, fines, penalties, interest, costs and expenses (including fees and disbursements of counsel) of every kind (i) based upon personal injury or death or injury to property to the extent any of the foregoing is proximately caused either by a defective product (including strict liability in tort) or by the negligent or willful acts or omissions of Customer or its officers, employees, subcontractors or agents, and/or (ii) arising from or relating to any actual or alleged infringement or misappropriation of any patent, trademark, mask work, copyright, trade secret or any actual or alleged violation of any other intellectual property rights arising from or in connection with the products, except to the extent that such infringement exists as a result of **Fantem** manufacturing processes.

IN NO EVENT SHALL **FANTEM** BE LIABLE FOR ANY INDIRECT, INCIDENTAL, PUNITIVE, SPECIAL OR CONSEQUENTIAL DAMAGES, OR DAMAGES FOR LOSS OF PROFITS, REVENUE, OR USE INCURRED BYCUSTOMER, COMPANY OR ANY THIRD PARTY, WHETHER IN AN ACTION IN CONTRACT, OR TORT, OR OTHERWISE EVENIF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. **FANTEM** LIABILITY AND CUSTOMER'S EXCLUSIVE REMEDY FOR ANY CAUSE OF ACTION ARISING IN CONNECTION WITH THIS AGREEMENT OR THE SALE OR USE OF THE PRODUCTS, WHETHER BASED ON NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY, BREACH OF AGREEMENT, OR EQUITABLE PRINCIPLES, IS EXPRESSLY LIMITED TO, AT **FANTEM** OPTION, REPLACEMENT OF, OR REPAYMENT OF THE PURCHASE PRICE FOR THAT PORTION OF PRODUCTS WITHRESPECT TO WHICH DAMAGES ARE CLAIMED. ALL CLAIMS OF ANY KIND ARISING IN CONNECTION WITH THIS AGREEMENT OR THE SALE OR USE OF PRODUCTS SHALL BE DEEMED WAIVED UNLESS MADE IN WRITING WITHIN THIRTY (30) DAYS FROM **FANTEM** DELIVERY, OR THE DATE FIXED FOR DELIVERY IN THE EVENT OF NONDELIVERY. THE INDEMNITY AND WARRANTY IN ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHER INDEMNITIES OR WARRANTIES, WHETHER EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

FCC NOTICE (for USA)

THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT.SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

STORE INDOORS WHEN NOT IN USE. SUITABLE FOR DRY LOCATIONS. DO NOT IMMERSE IN WATER. NOT FOR USE WHERE DIRECTLY EXPOSED TO WATER.

UL NOTICE (For USA).

1. Install only in a UL listed junction box sized 3×2×2.75 inch (75×50×70 mm) or larger, minimum volume 14 in3 (230 cm3).
2. Use Copper Conductors Only.
3. "CAUTION – Risk of Electric Shock – More than one disconnect switch may be required to de-energize the equipment before servicing".
4. "WARNING - This device shall not be used in combination with a wall switch controlling a receptacle."

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning

Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities.

Contact your local government for information regarding the collection systems available.

Certifications (regional):

Z-Wave and Z-Wave Plus are registered trademarks of Sigma Designs and its subsidiaries in the United States and other countries.
FCC ID: XBAFT132

FCC Part 15.19 Warning Statement

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

FCC Part 15.21 Warning Statement

NOTE: THE GRANTEE IS NOT RESPONSIBLE FOR ANY CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

FCC Part 15.105 Warning Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, this equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.

IC Warning:

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with RSS-102 — Radio Frequency (RF) Exposure guidelines, this equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.
le dispositif de a été évalués à répondre général rf exposition exigence. pour maintenir la conformité avec les directives d'exposition du RSS¬102 - Radio Fréquence (RF), ce matériel doit être installé et exploité à une distance minimale de 20 cm entre le radiateur et votre corps.

Association information

In-Wall Dimmer supports 4 association groups and Max 5 nodes for every group.

Association Group	Nodes	Send Mode	Send commands
Group 1	0	N/A	N/A
	[1,5]	Single Cast	When the load state of Nano Dimmer (on/off/dim the load) is changed: 1. Set Configuration parameter 80 to 0: Send Nothing (Default). 2. Set Configuration parameter 80 to 1: Send Hail CC. 3. Set Configuration parameter 80 to 2: Send the Basic Report. 4. Set Configuration parameter 80 to 3: Send Hail CC when using the manual switch to change the load state. 5. Set Configuration parameter 80 to 4: Send Switch Multilevel Report.
Group 2	0	N/A	N/A
	[1,5]	Single Cast	Forward the Basic Set, Switch Binary Set, Switch Multilevel Start Level Change, Switch Multilevel Stop Level Change, Switch Multilevel Set, Switch all to the associated nodes in Group 2 when the Nano Dimmer receives the Basic Set, Switch Binary Set, Switch Multilevel Start Level Change, Switch Multilevel Stop Level Change, Switch Multilevel Set, Switch all commands from main controller. (E.g. Send/forward Basic Set to control the other nodes in association Group 2)
Group 3	0	N/A	N/A
	[1,5]	Single Cast	Send Basic Set (configured by parameter 0x51) to the associated nodes in Group 3 when the external switch S1 is operated.
Group 4	0	N/A	N/A
	[1,5]	Single Cast	Send Basic Set (configured by parameter 0x52) to the associated nodes in Group 4 when the external switch S2 is operated.

Configuration parameters information

Parameter Number Hex / Decimal	Description	Default Value	Size
0x03 (3)	Current Overload Protection. Output Load will be turned off automatically after 30 seconds and if the current overrun 1.5A. 0 = Disabled. 1 = Enabled	1	1
0x04 (4)	Overheat protection. Output Load will be turned off automatically after 30 seconds and if the temperature of product inside exceeds 100 ℃. 0 = Disabled. 1 = Enabled	0	1
0x14 (20)	Configure the output status after re-power on it. 0 = Last status. 1 = Always on. 2 = Always off	0	1
0x50 (80)	To set which notification would be sent to the associated devices (Group 1) when the state of Nano Dimmer's load is changed. 0 = Send Nothing. 1 = Send Hail CC. 2 = Send Basic CC report. 3 = Send Multilevel Switch report. 4 = Send Hail CC when using the manual switch to change the load state.	0	1
0x51 (81)	To set which notification would be sent to the associated nodes in association group 3 when using the external switch 1 to switch the loads. 0 = Send Nothing 1 = Basic Set CC.	1	1
0x52 (82)	To set which notification would be sent to the associated nodes in association group 4 when using the external switch 2 to switch the loads. 0 = Send Nothing 1 = Basic Set CC.	1	1
0x55 (85)	State appointment 1: Set the ON time of output load. Value1 = 0, disable or = non zero, enable (day, bit0 - bit6 represent Mon to Sun). Value2 = ON (hour) Value3 = ON (minute) Value4 = ON (brightness level)	Value1=00 Value2=18 Value3=00 Value4=99	4
0x56 (86)	State appointment 2 Set the ON time of output load. Value1 = 0, disable or = non zero, enable (day, bit0 - bit6 represent Mon to Sun). Value2 = ON (hour) Value3 = ON (minute) Value4 = ON (brightness level)	Value1=00 Value2=23 Value3=00 Value4=00	4
0x5A (90)	Enables/disables parameter 91 and 92 below: 1 = enabled 0 = disabled.	0	1
0x5B (91)	The value here represents minimum change in wattage (in terms of wattage) for a REPORT to be sent (Valid values 0-60000).	25 (W)	2
0x5C (92)	The value here represents minimum change in wattage percent (in terms of percentage) for a REPORT to be sent (Valid values 0-100).	5 (%)	1
0x64 (100)	Set 101-103 to default.	N/A	1
0x65 (101)	Which reports need to send in Report group 1 (See flags in table below).	0x00 00 00 00	4
0x66 (102)	Which reports need to send in Report group 2 (See flags in table below).	0x00 00 00 00	4
0x67 (103)	Which reports need to send in Report group 3 (See flags in table below).	0x00 00 00 00	4
0x6E (110)	Set 111-113 to default.	N/A	1
0x6F (111)	The time interval of sending Report group 1 (Valid values 0x01-0x7FFFFFFF).	0x00 00 00 03	4
0x70 (112)	The time interval of sending Report group 2 (Valid values 0x01-0x7FFFFFFF).	0x00 00 02 58	4
0x71 (113)	The time interval of sending Report group 3 (Valid values 0x01-0x7FFFFFFF).	0x00 00 02 58	4
0x78 (120)	Configure the external switch mode for S1. 0 = Unidentified mode. 1 = 2-state switch mode. 2 = 3-way switch mode. 3 = momentary switch button mode. 4 = Enter automatic identification mode. Note: When the mode is determined, this mode value will not be reset after exclusion.	0	1
0x79 (121)	Configure the external switch mode for S2. 0 = Unidentified mode. 1 = 2-state switch mode. 2 = 3-way switch mode. 3 = momentary switch button mode. 4 = Enter automatic identification mode. Note: When the mode is determined, this mode value will not be reset after exclusion.	0	1
0x7A (122)	Get the state of touch panel port. 0 = the touch panel is not connected. 5 = the touch panel is connected.	0	1
0x7B (123)	Set the control destination for external switch S1 1 = control the output loads of itself. 2 = control the other nodes. 3 = control the output loads of itself and other nodes.	3	1
0x7C (124)	Set the control destination for external switchS2 1 = control the output loads of itself. 2 = control the other nodes. 3 = control the output loads of itself and other nodes.	3	1
0x7D (125)	Set the default dimming rate.	3	1
0x80 (128)	Get the current working mode 0 = unknown 1 = 2-wire mode 2 = 3-wire mode Note: 1. This parameter is a Get-only parameter. 2. When the mode is determined, this mode value will not be reset after exclusion.	0	1
0x81 (129)	Set the dimming principle 0 = Trailing edge mode 1 = Leading edge mode Note: When the mode is determined, this mode value will not be reset after exclusion.	1	1
0x82 (130)	To get what type of load the Dimmer is connected to. 0 = Unknown 1 = Resistive load 2 = Capacitive load 3 = Inductive load Note: 1. This parameter is a Get-only parameter. 2. When the load type is determined, this type value will not be reset after exclusion.	0	1
0x83 (131)	Set the min brightness level that the load can reach to. Note: When the level is determined, this level value will not be reset after exclusion.	0	1
0x84 (132)	Set the max brightness level that the load can reach to. Note: When the level is determined, this level value will not be reset after exclusion.	99	1
0xF9 (249)	Set the recognition way of load 0 = Never recognize the load when power on. 1 = Only recognize once when first power on. 2 = Recognize the load once power on.	2	1
0xFC (252)	Lock/unlock configuration parameters 0 = Unlock. 1 = Lock	0	1
0xFF (255)	1. Value=0x55555555, Default=1, Size=4 Reset to factory default setting and removed from the z-wave network	N/A	4
	2. Value=0, Default=1, Size=1 Reset all configuration parameters to factory default setting	N/A	1

Configuration Values for parameter 101-103:

	7	6	5	4	3	2	1	0
